### **Abstract**

Islamic Banking is considered an important subject that researchers and economists are interested in nowadays. Studying economic development finance, identifying and overcoming its obstacles are one of the important issues that help pave the way to economic development. To that end, the researcher seeks to define Islamic Banks, identify the difficulties which they face in Syria, and make proposals. The study shows that there are many obstacles facing the Islamic Banks in Syria, and presents a number of suggestions which might contribute to overcome these hindrances and accelerate the achievement of economic development in Syria.
