

The Impact of Multi-Modal Transport in Developing the Arab Inter-trade

Mahmoud Zanboa
Faculty of Economic
Damascus University

Abstract

The purpose of this research is to highlight multi-modal transport and to study the impact of activating such transport in developing the Arab inter-trade. This could be done through out the following steps:

- Ensuring multimodal transport requirements of infrastructure which includes road and rail networks, airports and ports that meet the International standards;
- Upgrading the uncompleted connecting corridors and connecting links between the Arab countries;
- Uniting laws and legislations of transport and traffic and simplifying them in a way to realize flexibility and promptness of transporting goods and exchanging containers;
- To work on putting Arab transport agreements of different types into force;
- Activating the Arab inter-trade.
