### **Abstract**

**This paper aims to study the state of the quality management in construction projects in Syria, evaluate this state in the light of international trends and principals of quality management in construction industry in order to obtain suggestions that can improve quality management in the construction sector in Syria.**

**This has been done by reviewing legal and management framework of the construction industry in Syria, and by preparing and distributing a questionnaire to (77) professional persons in Syrian construction industry.**

**It has been found in this research work that the quality management in construction projects in Syria has serious problems and weaknesses. The paper ends with providing some suggestions which may contribute to avoid some troubles of quality management in Syrian construction industry.**
